## NEW MEMBERS STRATEGY

**Networking Benefits**  
Don't underestimate the networking benefits of membership when you are trying to attract new members. For many people making contacts, enjoying fellowship and having fun are the most important benefits of Rotary Membership.

Guest Speaker -  
DG Brian Trenary

In opening Brian thanks those responsible for him taking on the DG role especially Rob Cuzens, and the support being provided by Gordon as his Program Developer for Conference next year, his Ian Sadler who has developed into his right hand man as secretary.

Brian's address focused on this year's theme of "Reach Within to Embrace Humanity", and its three ingredients of Family, Continuity and Change.

On family Brian spoke of how good families build good neighbourhoods, good neighbourhoods make good communities, and good communities build strong nations.

Projects such as walking tracks can bring families together, and our projects such as tertiary awards, father of the year, and camp quality help build our communities.

We should continue with those projects we can do well, but not over burden ourselves. In the words of a past Rotary International President, "no project is too small or insignificant, especially to those who benefit".

We should ensure we have fun along the way, and although we should be seeking younger members and communication methods such as Face book, we have to respect our older members and their needs.
